

H₂ XPO

HYDROGEN FOR THE INDUSTRY

8 & 9 OCTOBER 2025 | KORTRIJK XPO

WWW.H2XPO.COM

WHY H₂ XPO?

Sustainable business is the future. More and more companies and organizations realize this and are preparing for it.

But not every company or agency is ready for this drastic change yet. **Nevertheless, according to the European Union's goal, all companies must reduce their CO₂ emissions by 55% by 2030 and be climate neutral by 2050.**

The time has come to extensively inform a broad audience from the industry and transport sector. After all, they often lack the knowledge and technologies to become carbon neutral. The possibilities of hydrogen and decarbonization are also often still unknown to them.

Therefore, **your role as a producer, distributor, agent or service provider is crucial** for these players. Just like a platform where they can interact with you to work towards a more sustainable future: H₂ Xpo.

EXHIBITORS

Do you specialize in one of the following areas?

Technology, consulting and services for engineering, installation, operation and maintenance of hydrogen applications & decarbonization solutions.

VISITORS

- **production managers**
- **engineers**
- **CEOs**
